- None of the above

Describe any current STEM outreach initiatives or partnerships your institution has with local high schools. If applicable, please include points of contact at your partner high school(s):

Is your institution an NSF RET site?

- Yes
- No
E4USA University Expectations

Colleges and universities are invited to join E4USA for the 2020-2021 school year. To become an E4USA partner, each institution must provide financial support in the form of $5,000/year as a stipend per teacher at each high school. Institutions must also be able to provide $2,500 in funding for classroom materials and supplies. **The total cost for supporting an E4USA high school site is $7,500 per school per year.**

*Stipends will be an annual cost, while materials and supplies generally should not be as cost-intensive in subsequent academic years.*

- I understand the statement above and my institution will be able to provide $7,500 to support an E4USA high school site.
- I understand the statement above and my institution will NOT be able to provide $7,500 to support an E4USA high school site.

Briefly describe how your institution will provide the required funding to support a high school site:

E4USA college and university partners are also asked to partner with high schools by providing mentoring and curricular support, as well as technical support in implementing the curriculum.

- I understand the statement above, and my institution will provide the necessary resources and personnel to provide mentoring and curricular support to E4USA teachers and students.
- I understand the statement above, and my institution will NOT provide the necessary resources and personnel to provide mentoring and curricular support to E4USA teachers and students.
